

# OPEN DATA SCIENCE CONFERENCE

London | Nov. 19 - Nov. 22 2019

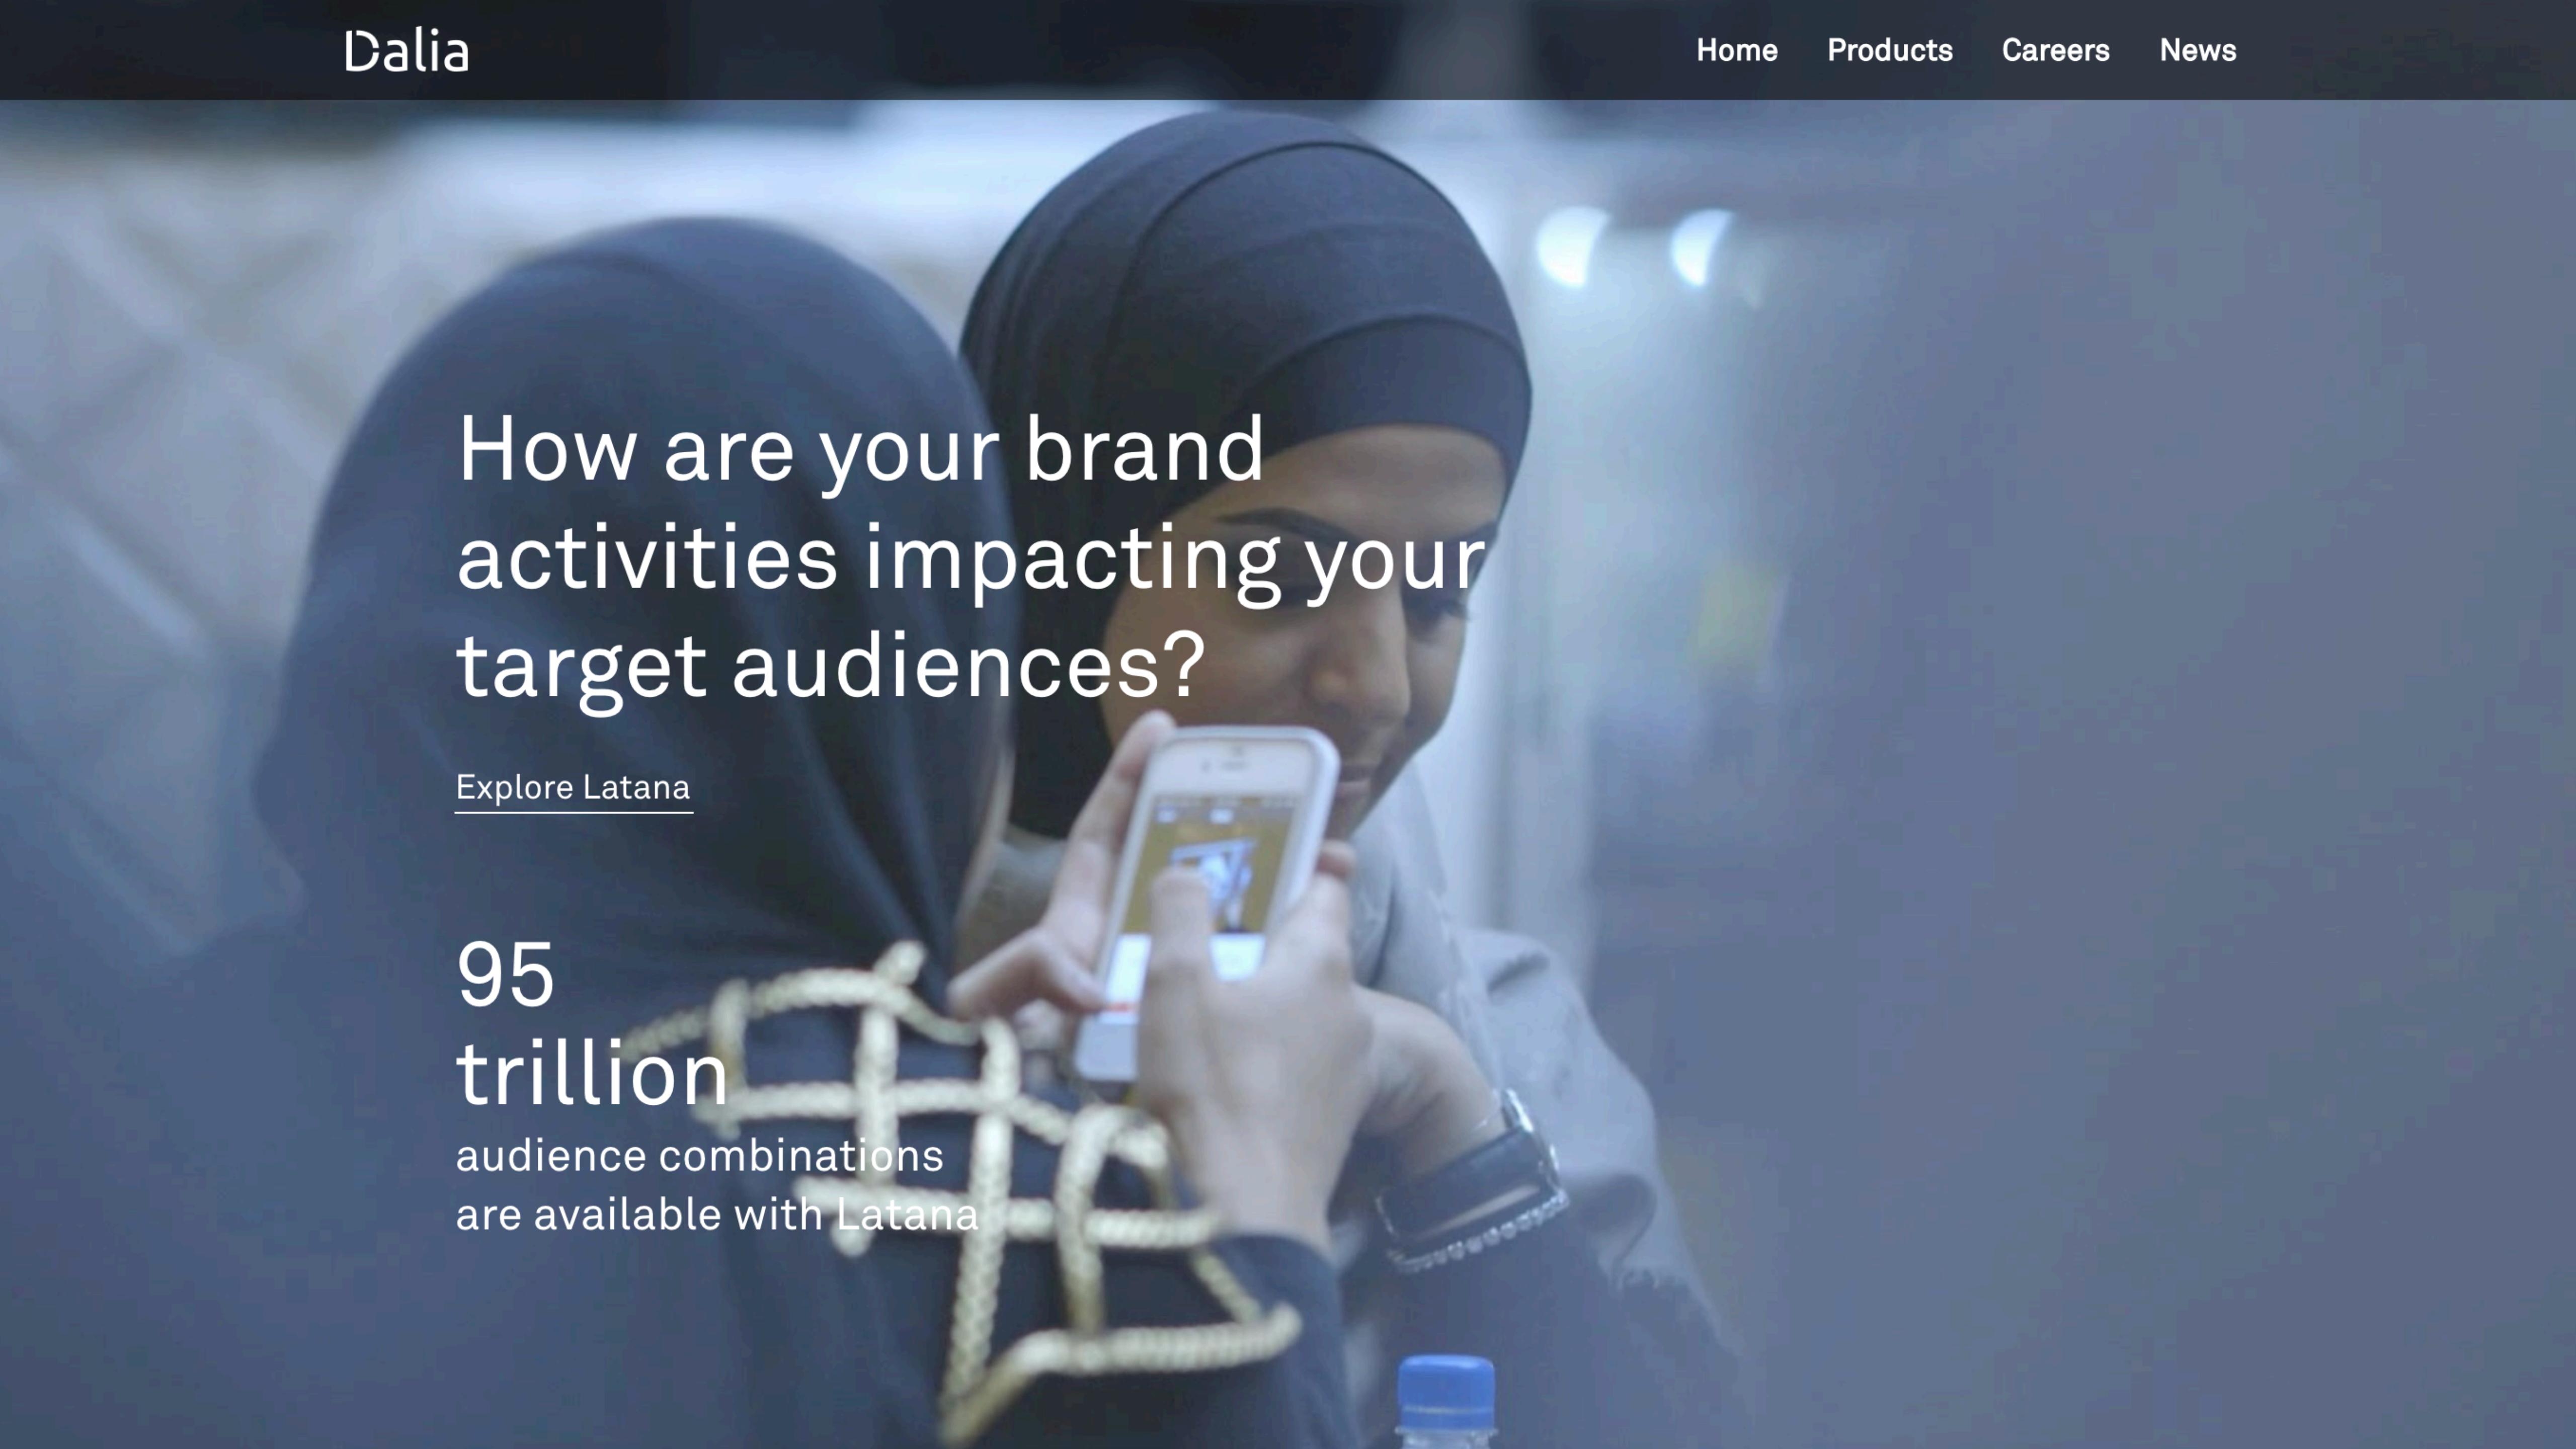

# Using Bayesian methods to build a Data Science Product

Korbinian Kuusisto  
Data Scientist @ Dalia Research

Twitter @kuusisto\_k | Github <https://kkuusisto.github.io/>

A woman with long, light-colored hair is shown from the chest up, looking down at a smartphone she is holding in her hands. She is wearing a dark zip-up hoodie. The background is dark and out of focus, suggesting an outdoor setting at night or in low light. The phone's screen is the primary light source, illuminating her face and hair.

The voices of  
billions

A woman wearing a dark hijab is looking down at her smartphone. She is wearing a light-colored jacket over a dark top. The background is blurred, suggesting an indoor setting.

How are your brand  
activities impacting your

# Outline of talk

Building a next generation  
brand tracker

Why bother with  
Bayesian frameworks

PyMC3 in production

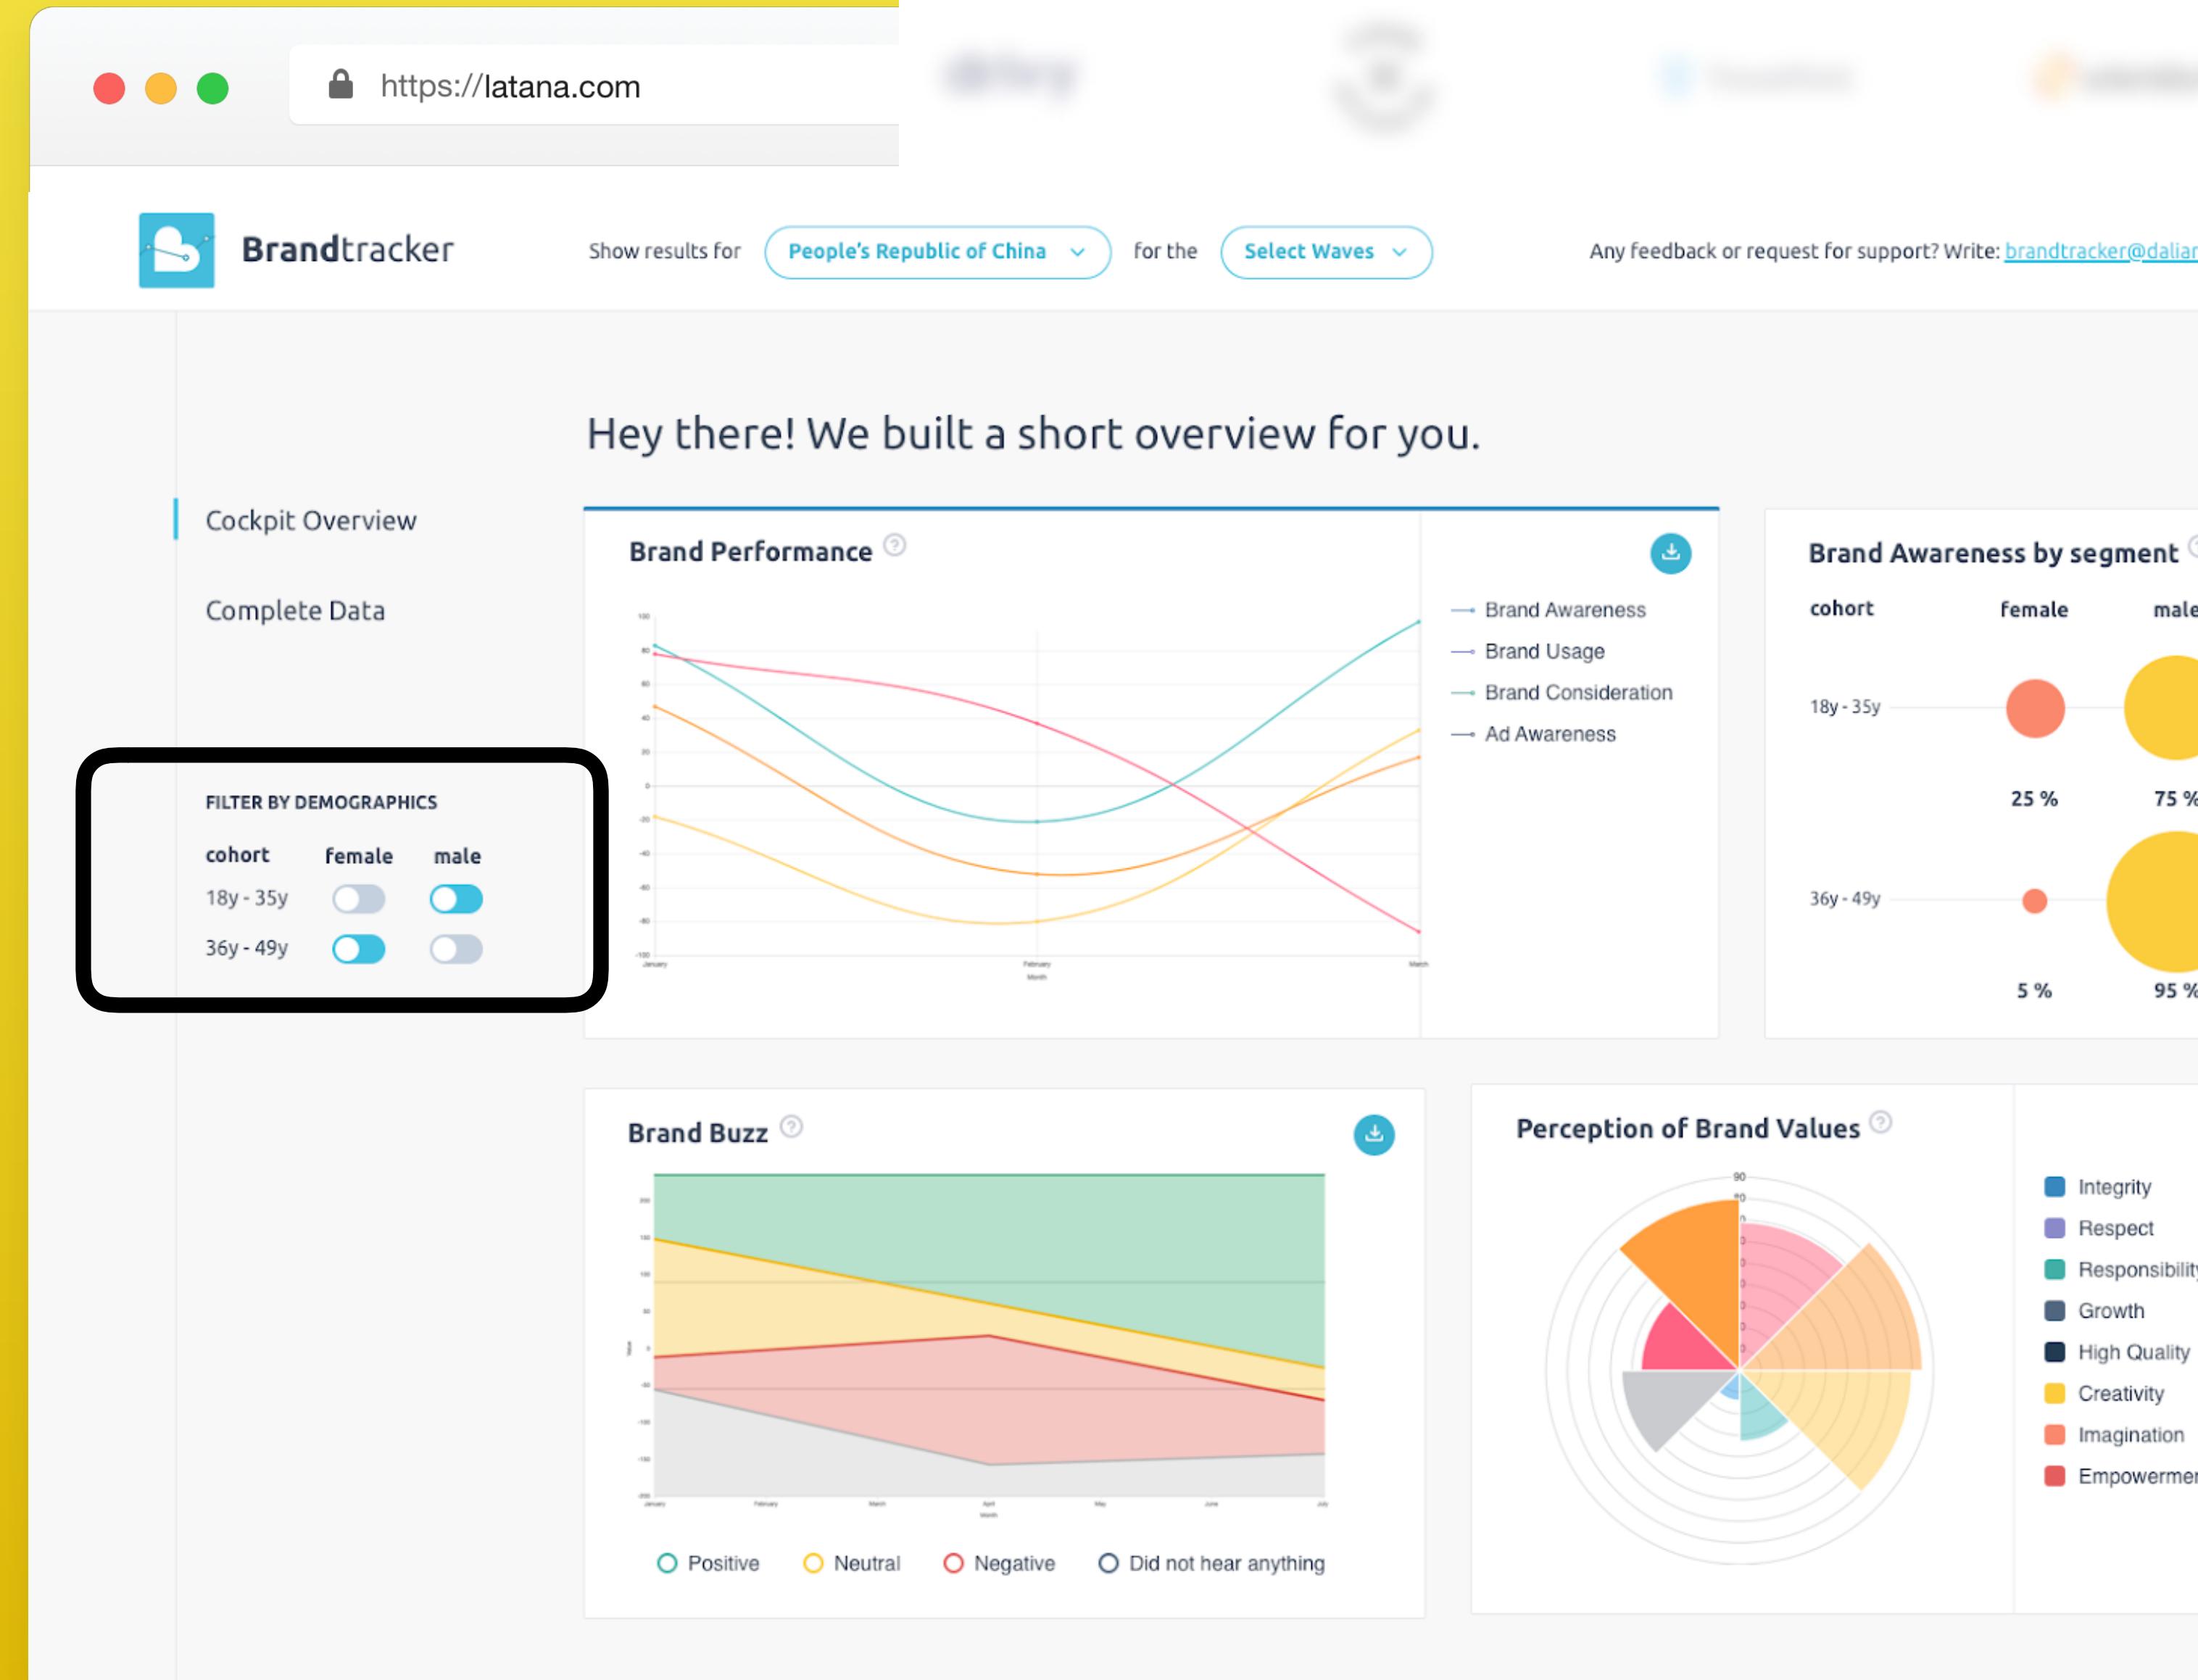

There are hundreds of consumer startups and everyone is investing into brand.

Is this money well spend?

2017 we launched  
BrandTracker

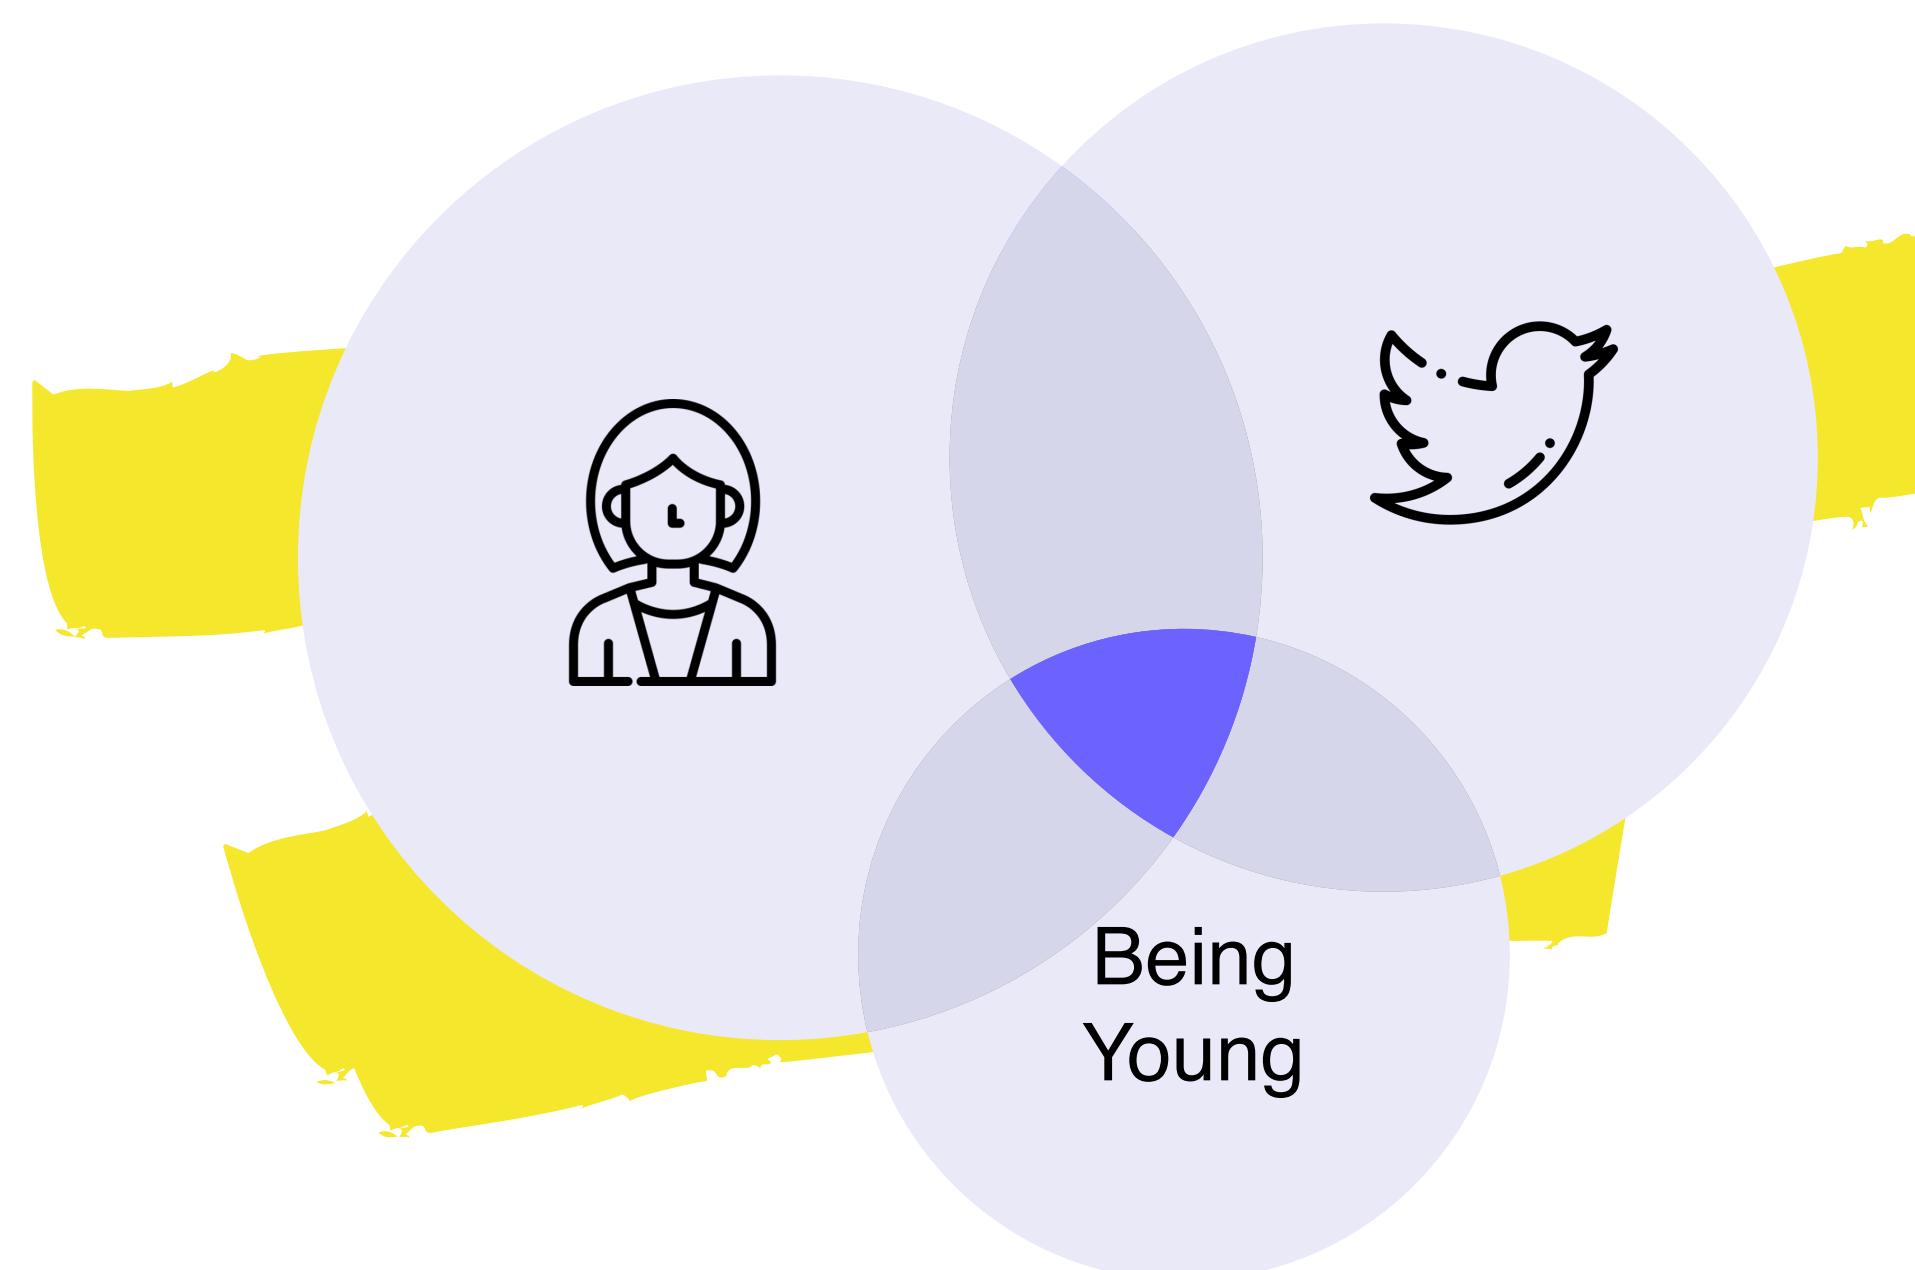

Brand managers are interested in target audiences

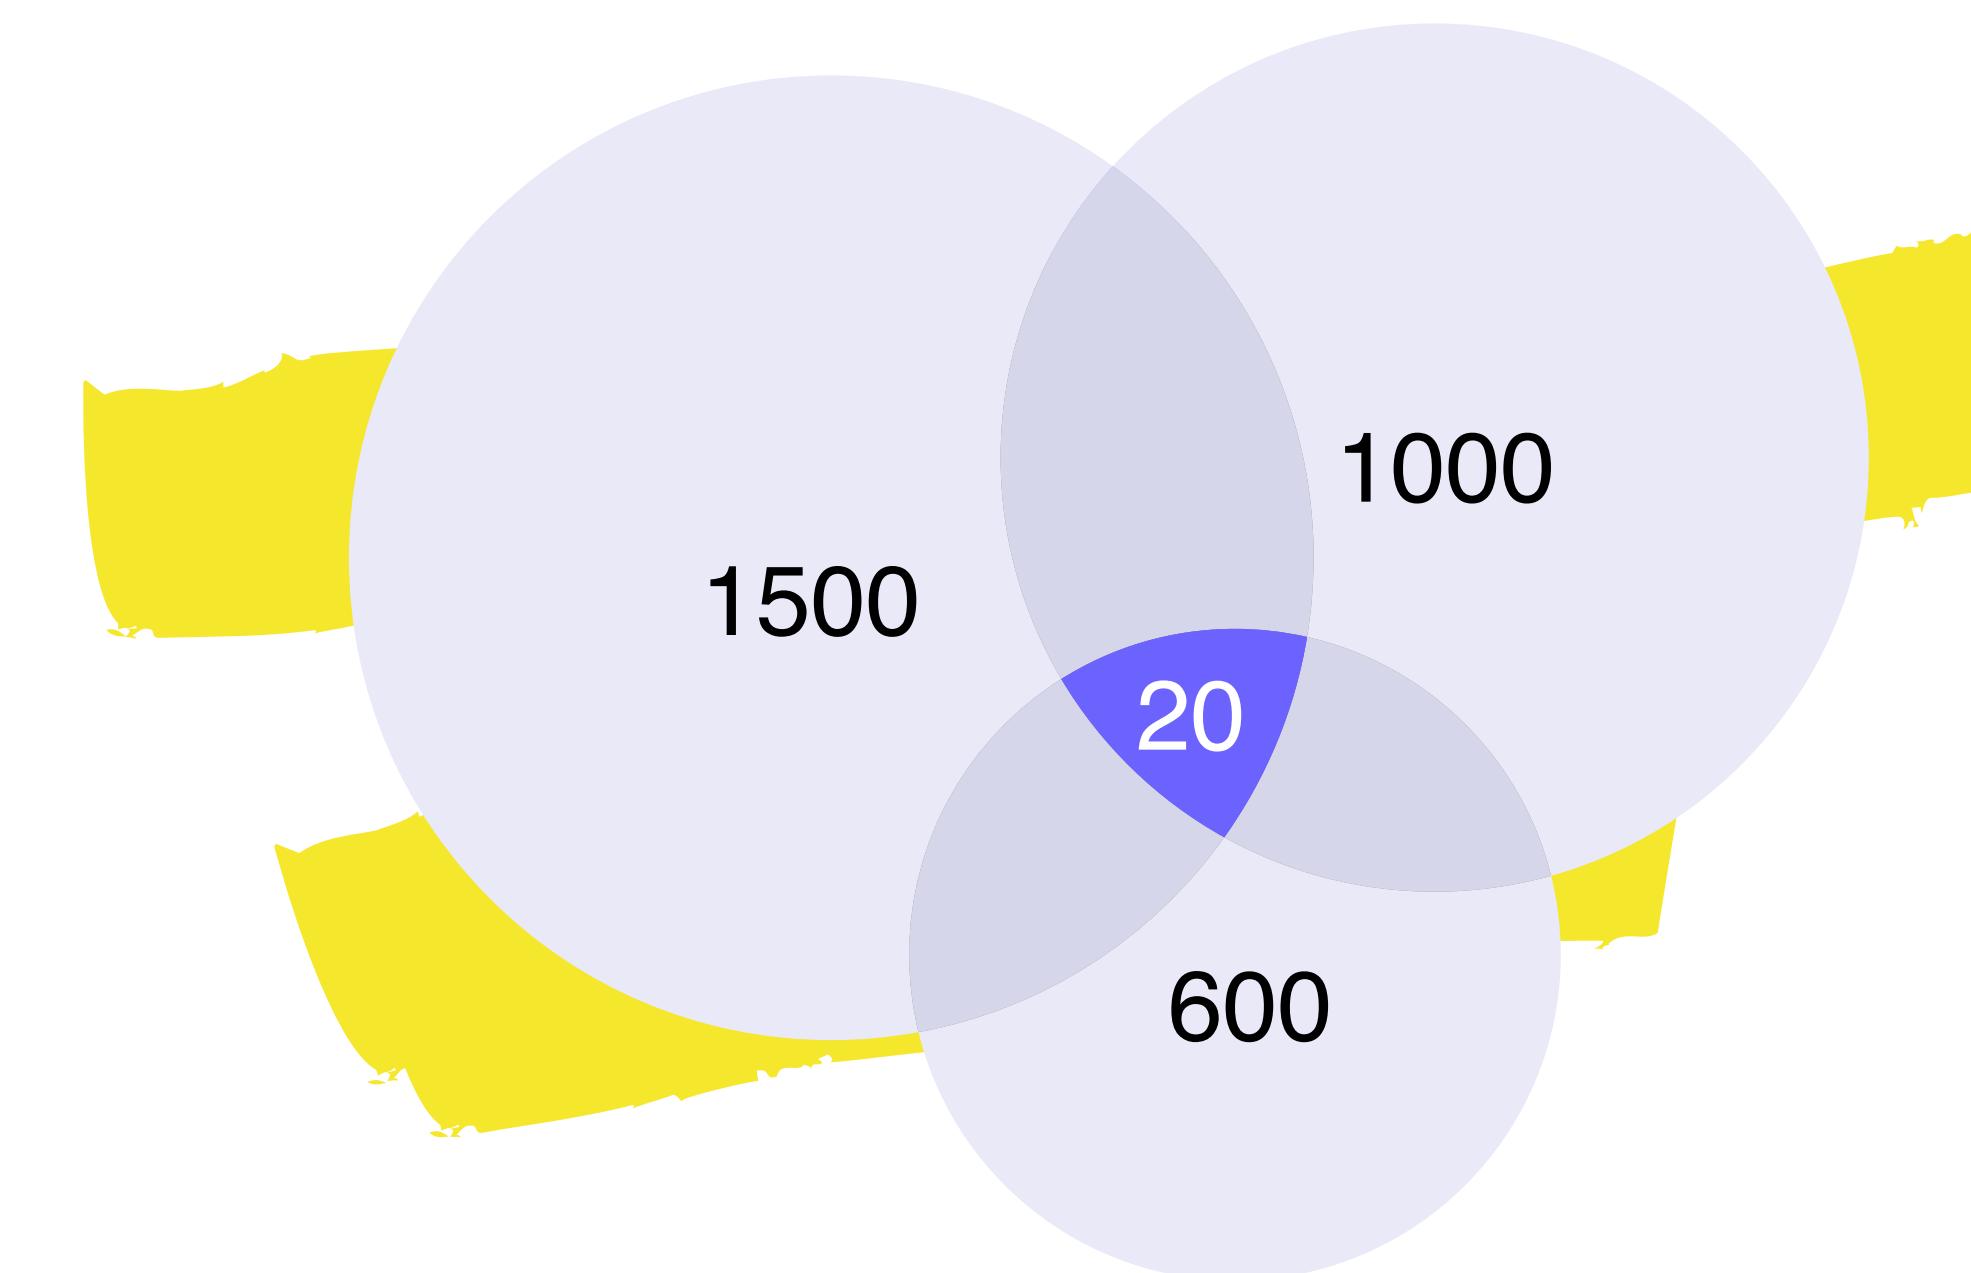

# Target audiences

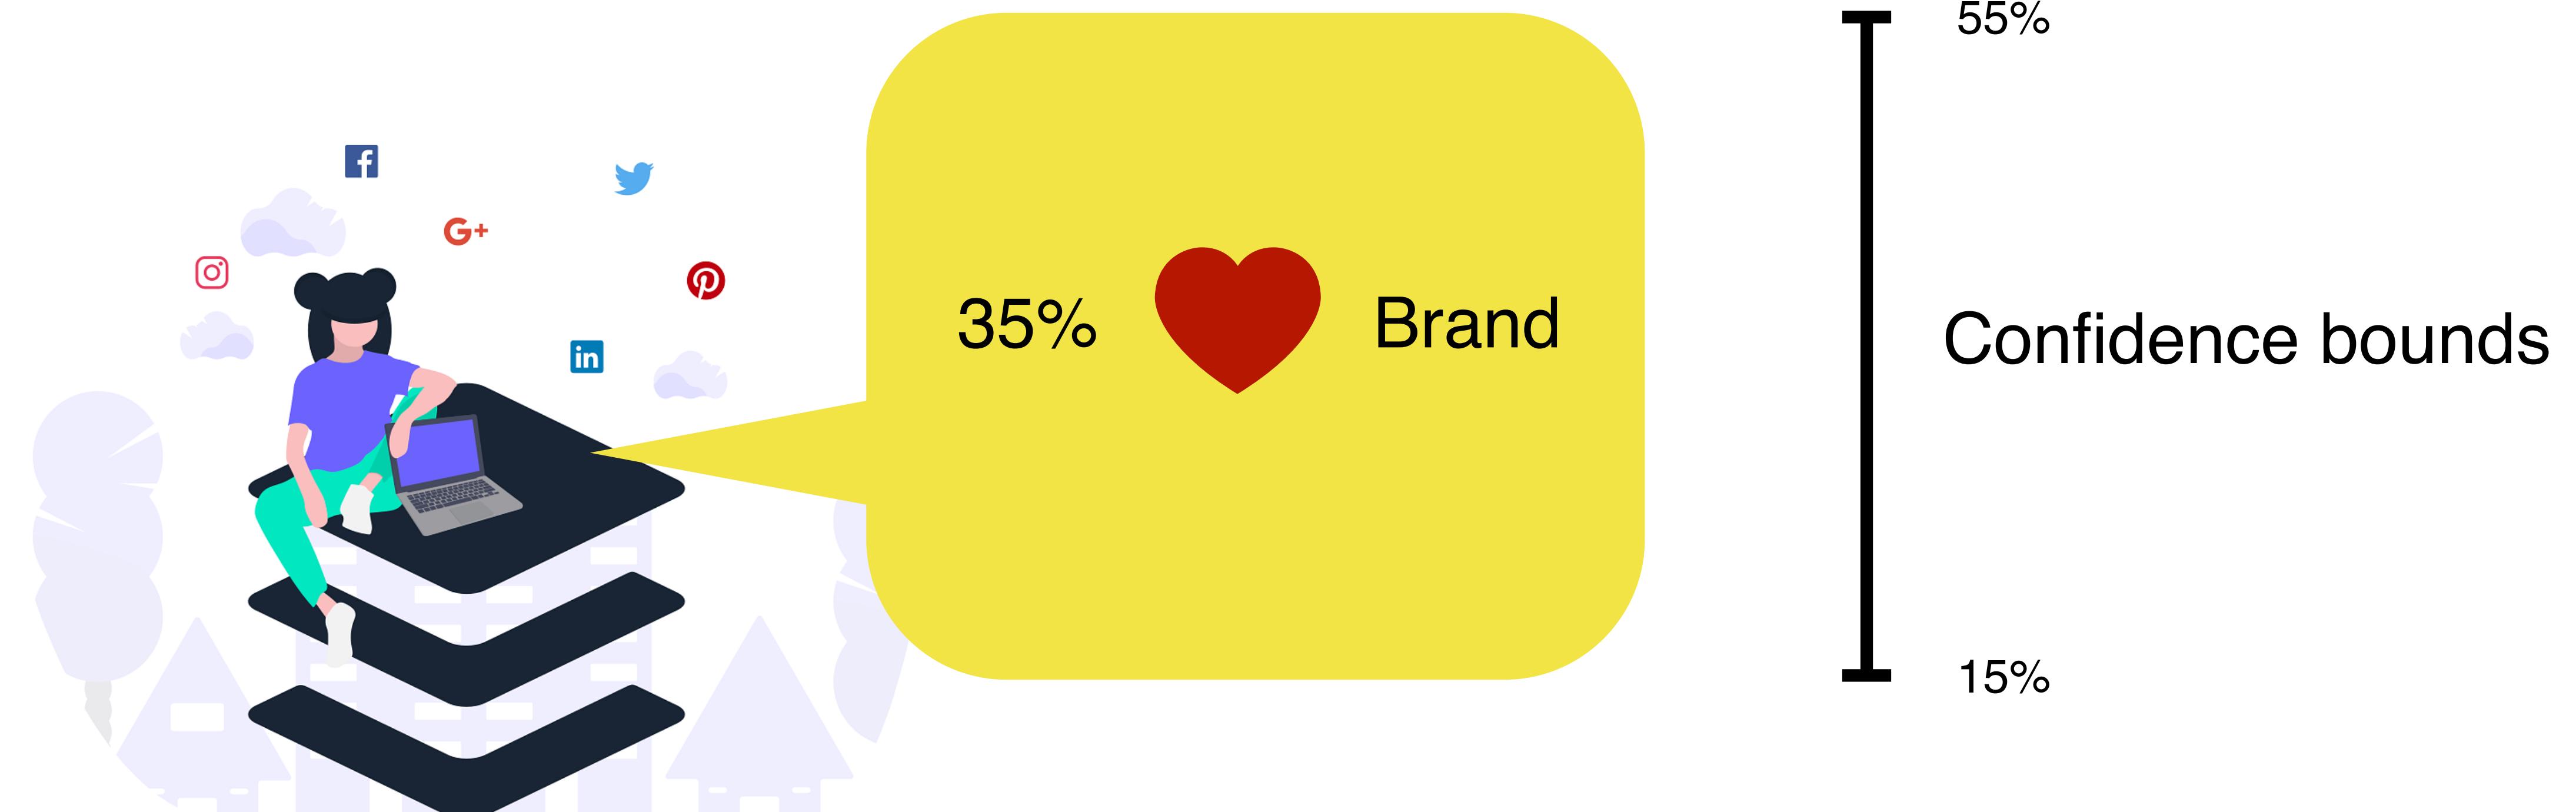

# Why is that a challenge?

n = 3000 people

# Why is that a challenge?

n = 20

We need to  
fundamentally rethink our  
product

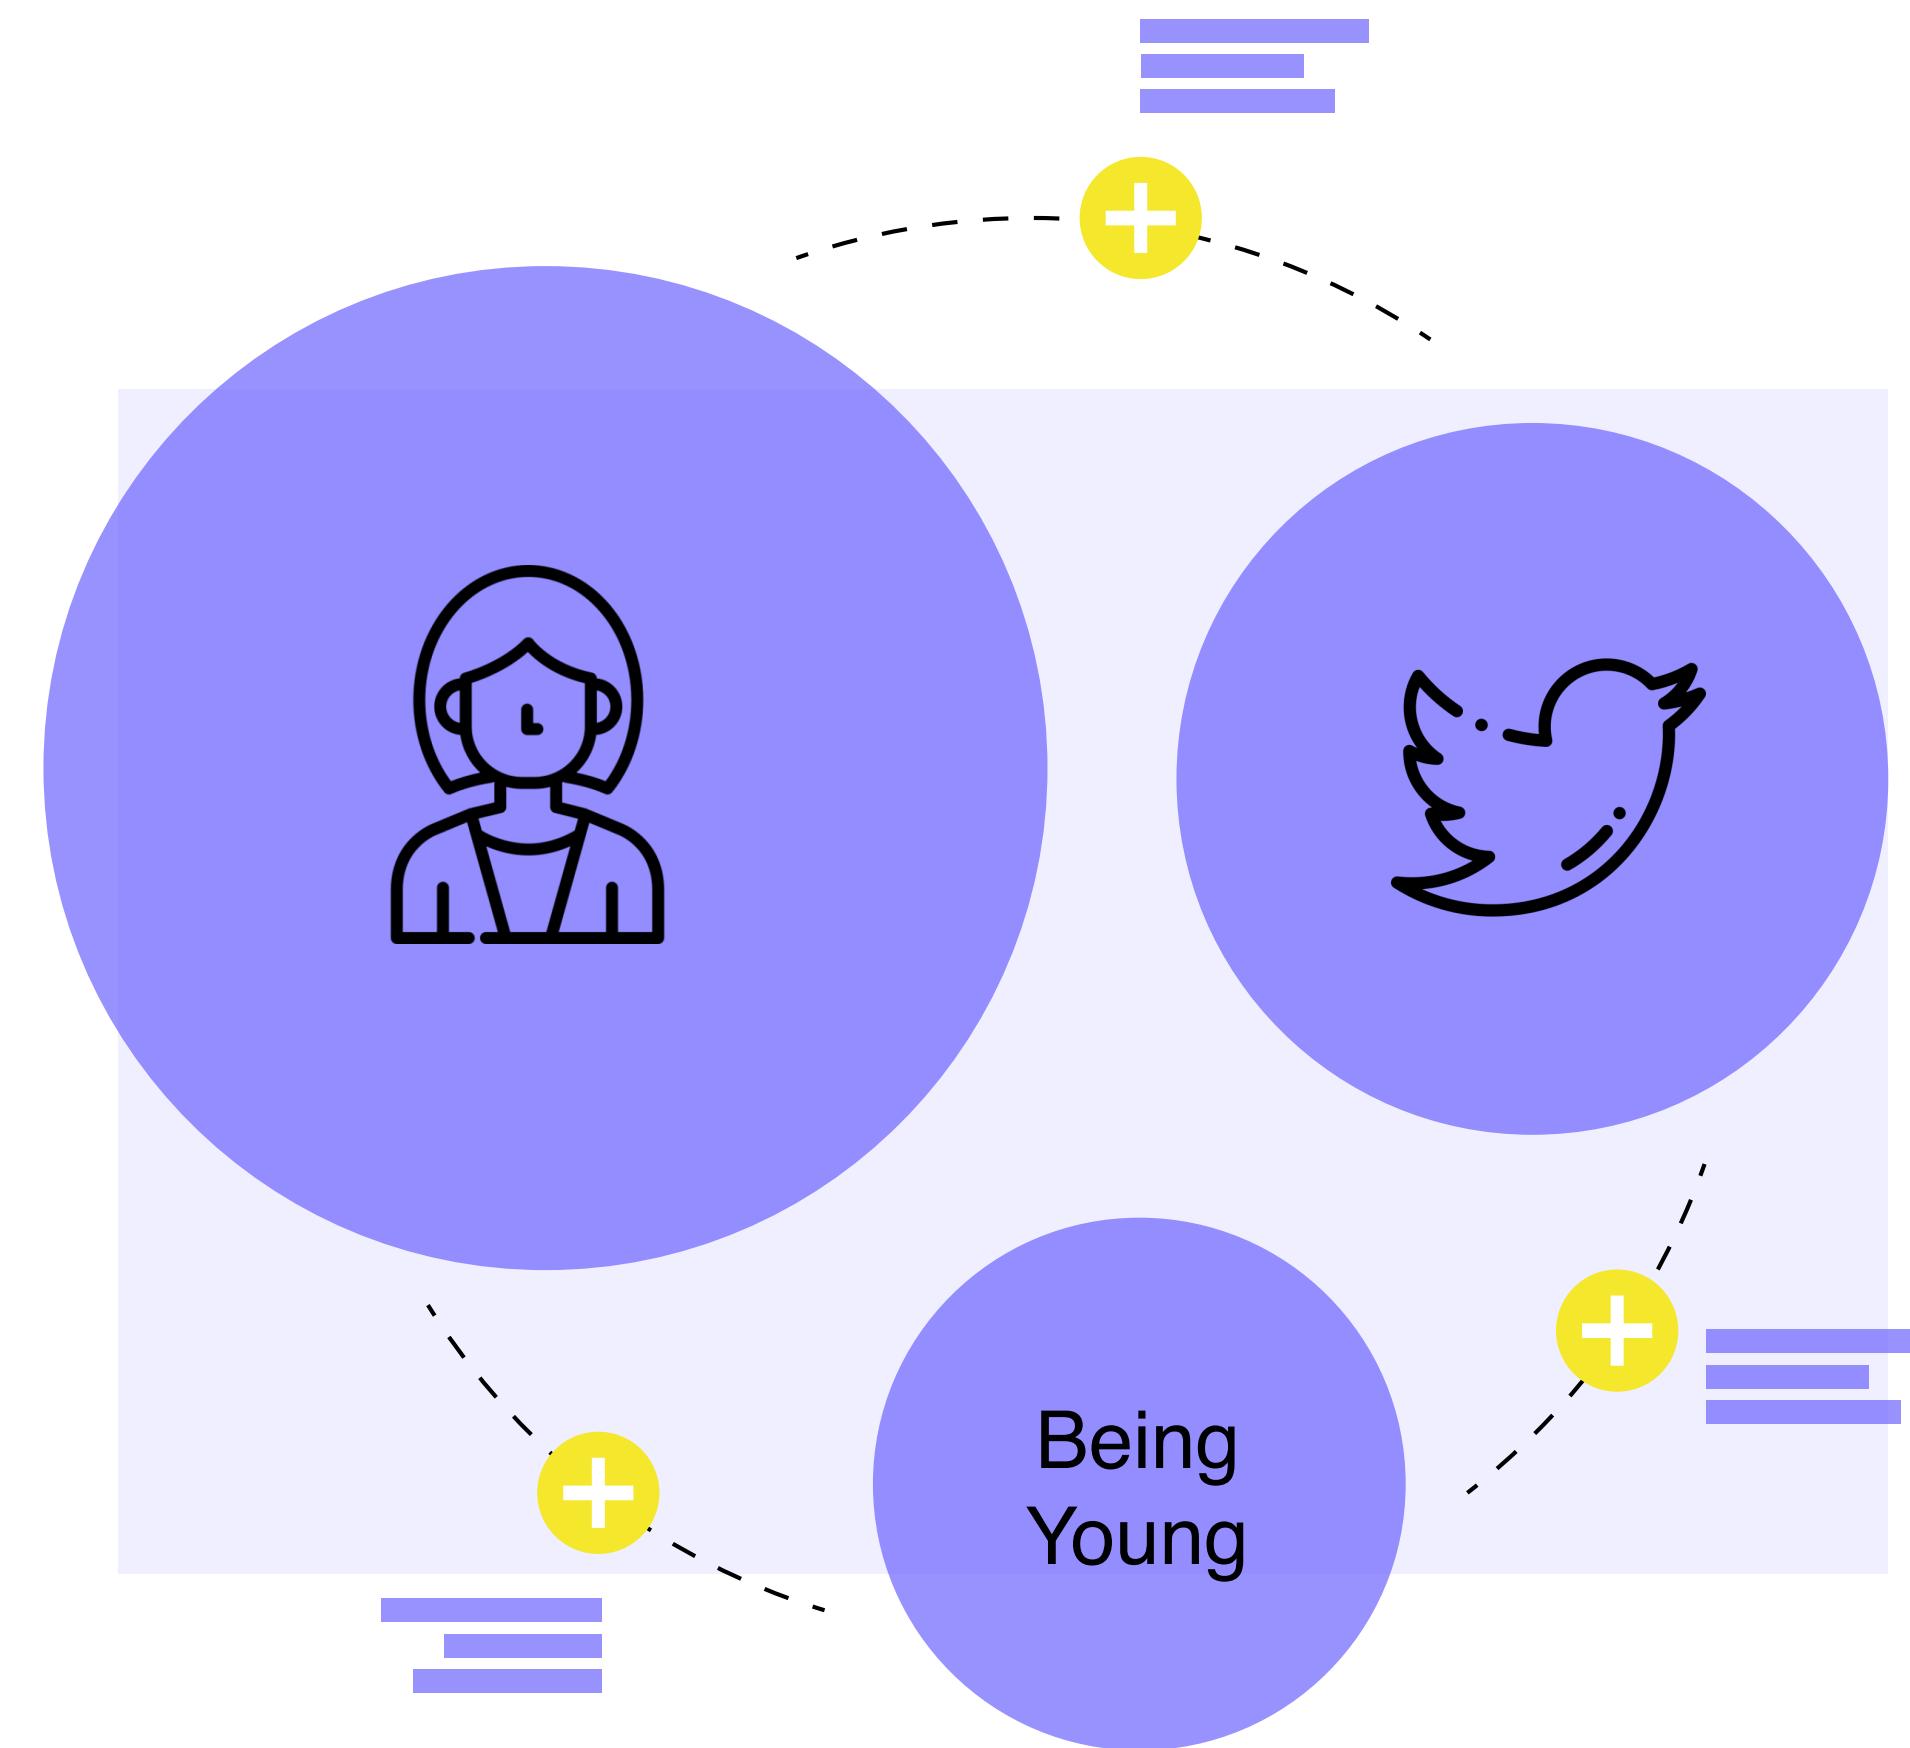

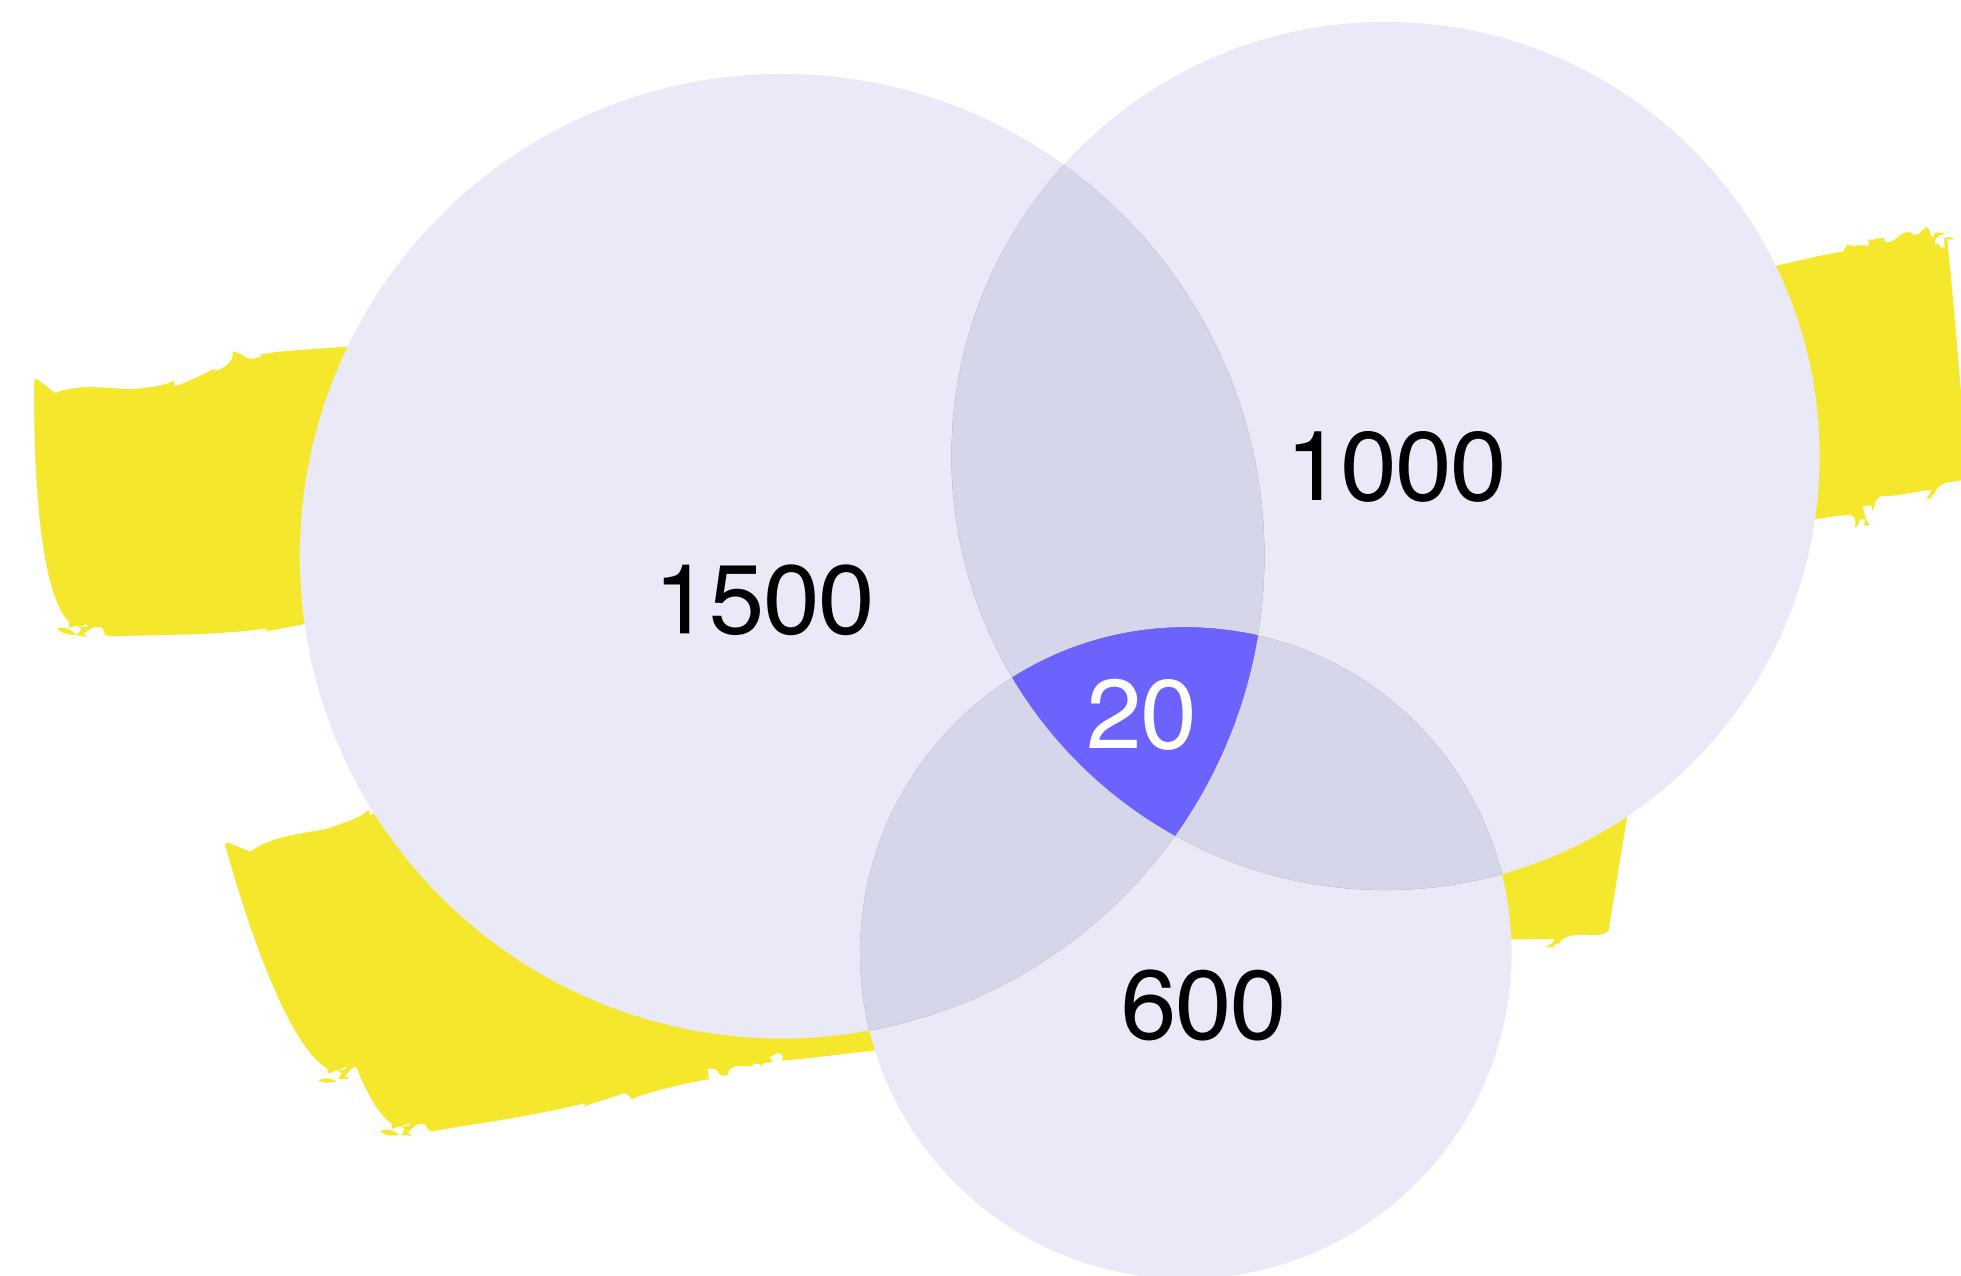

# MRP

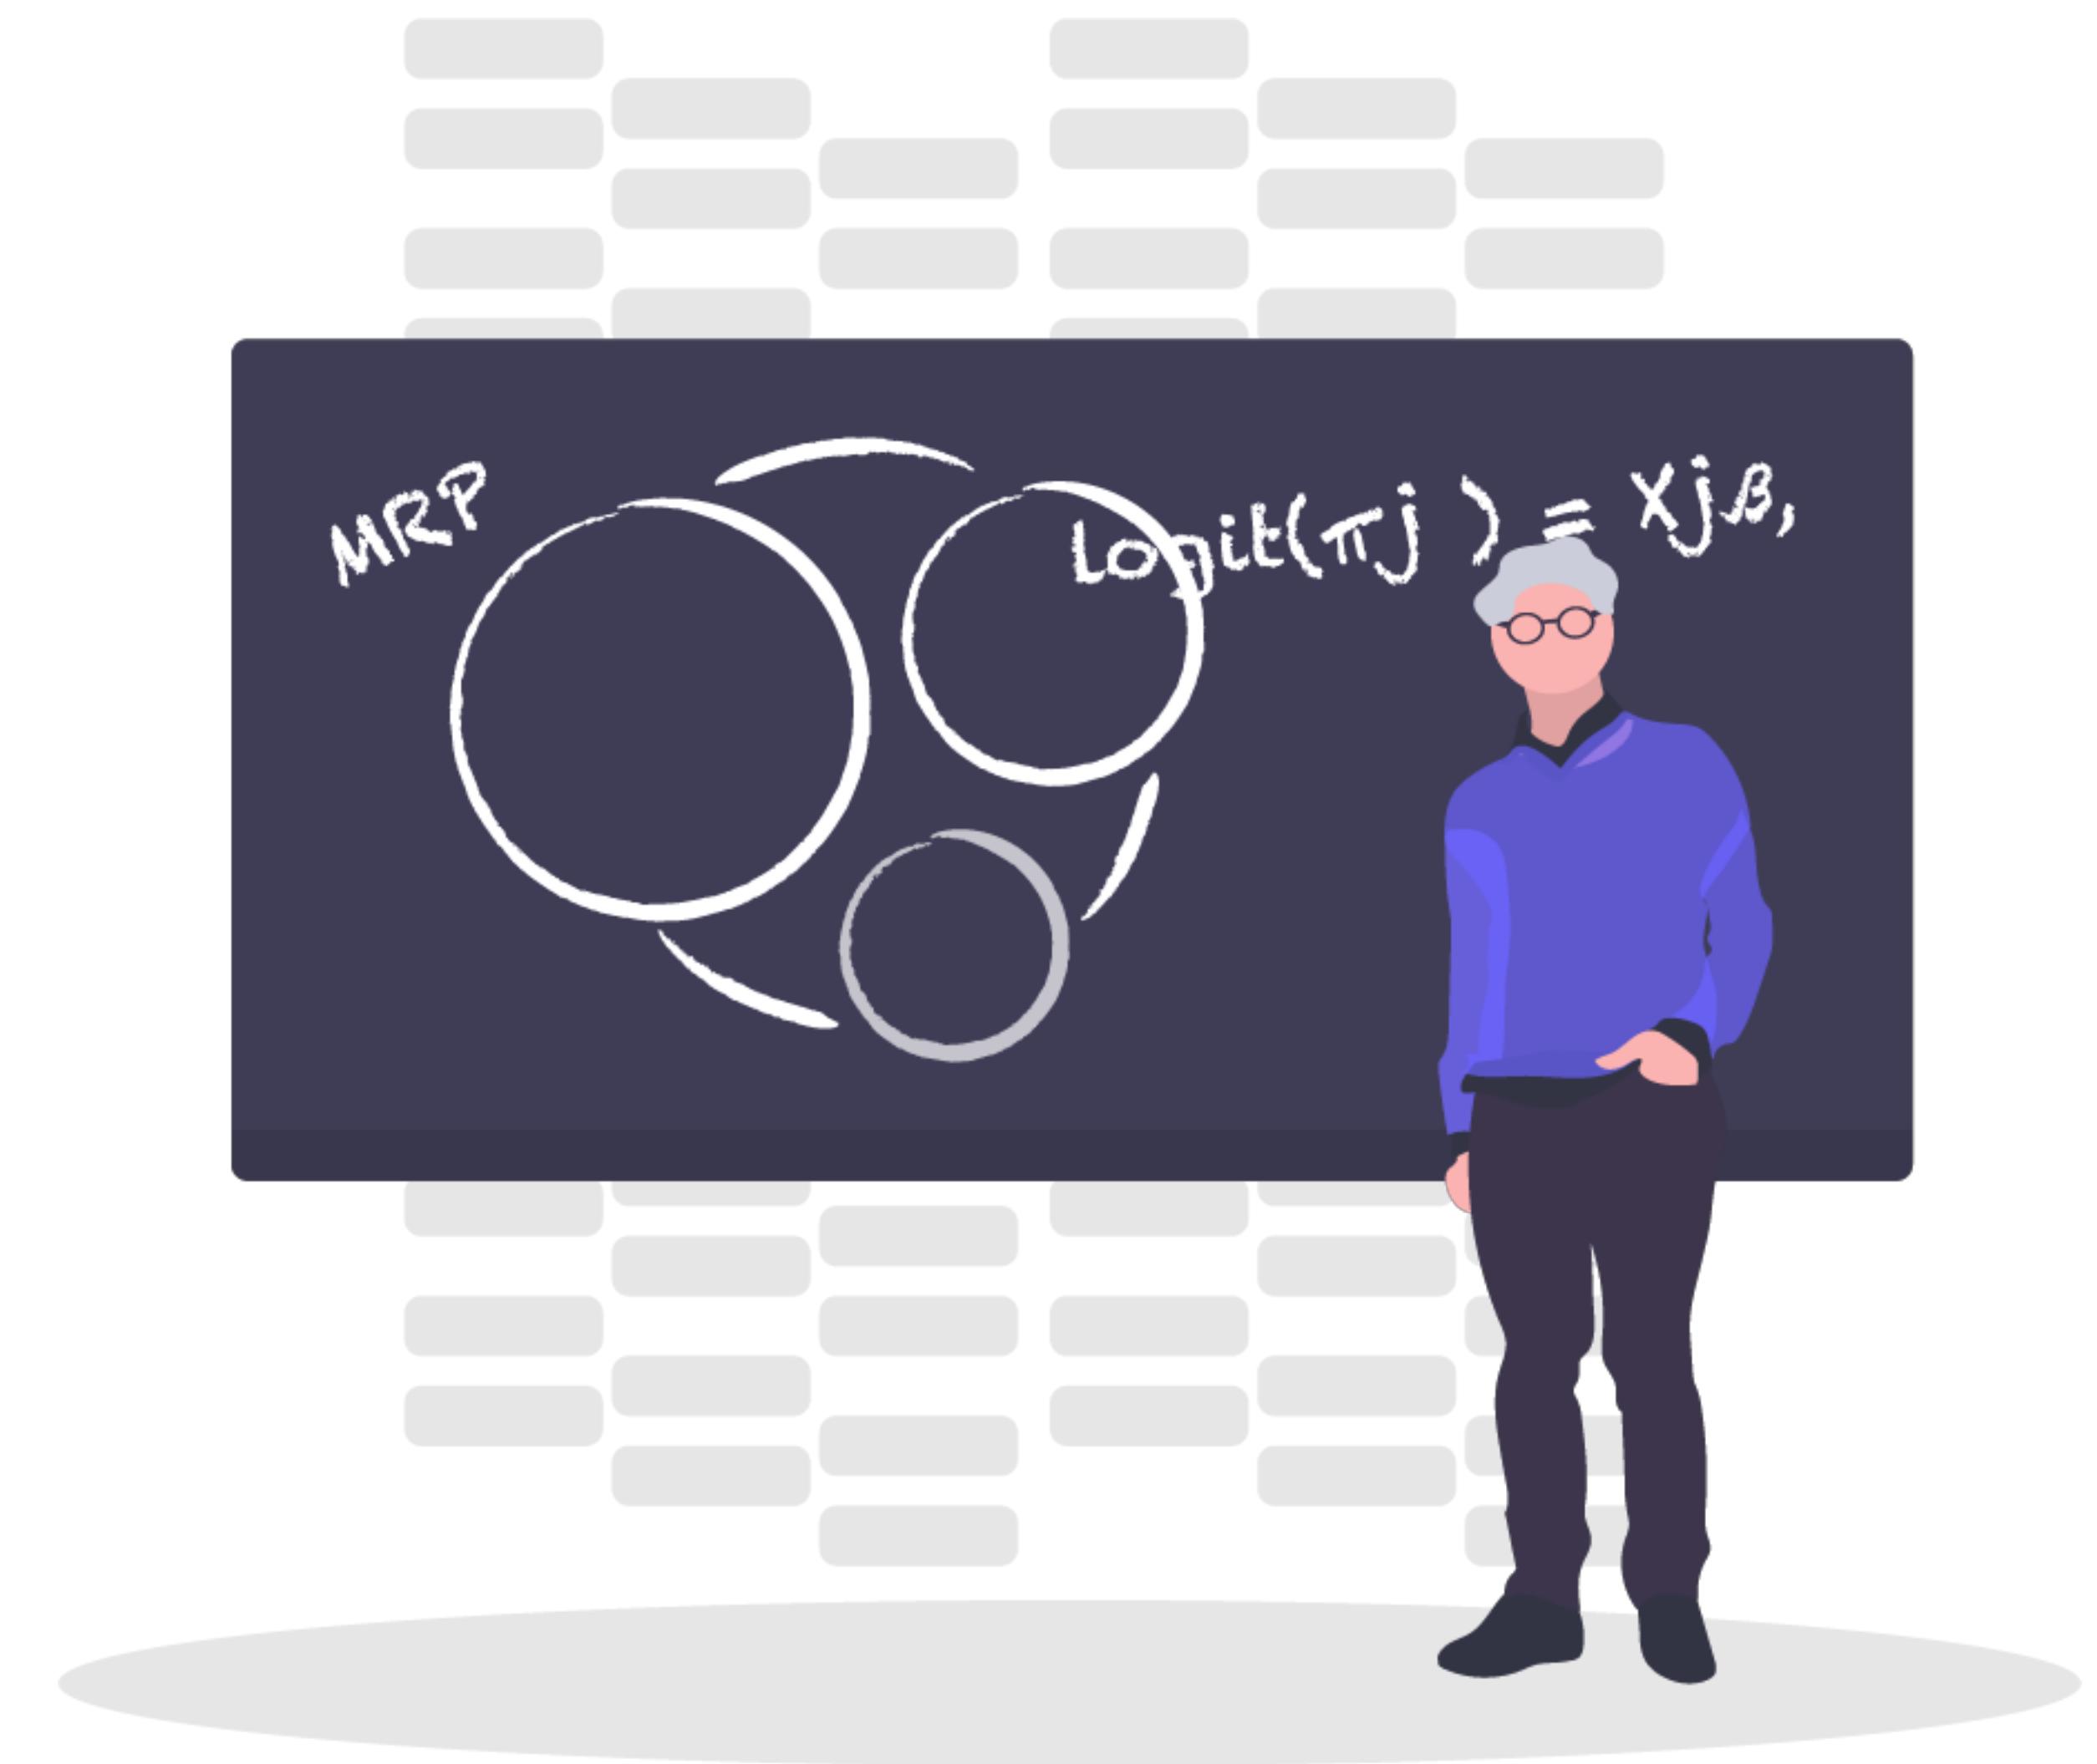

Multilevel  
Regression &  
Post-stratification

# MRP

First introduced by Gelman and Little (1997)

# BrandTracker

Uncertainty  
quantification

# 1 Learning from prior information

The screenshot shows a web browser window for <https://latana.com>. The page features the Blinkist logo at the top left. On the right, there's a large purple title "Bestselling books in brief". Below it, a text block explains that the app provides key ideas from bestselling nonfiction books in 15-minute text and audio format. A green button invites users to "Start 7-day free trial". To the right, a book summary for "The 7 Habits of Highly Effective People" by Stephen R. Covey is displayed, showing a thumbnail image of the book cover, a "Read" button, a "Listen" button, a short description, and a "Who should read this?" section. The background of the slide features abstract purple and red shapes on a yellow gradient background.

## Aided Awareness

Audience:

25-49 Urban

Age: 18-35 | Gender: Male | Income: Low Education: Low, Medium | Loc: Top 3

Aided Awareness

 AirHelp

17%

There is 70 percent brand consideration of your created audience '25-49 urban' in Germany, for Airhelp.

Change:

From: 13th March to: 13th June

▲ 2%

Change Probability:

Low

55%

The probability that the change was due to a real world event is high at (5%)

## Brand Consideration

Audience:

25-49 Urban

Age: 18-35 | Gender: Male | Income: Low Education: Low, Medium | Loc: Top 3

Brand Consideration:

 AirHelp

80%

There is 70 percent brand consideration of your created audience '25-49 urban' in Germany, for Airhelp.

Change:

From: 13th March to: 13th June

▲ 3%

Change Probability:

High

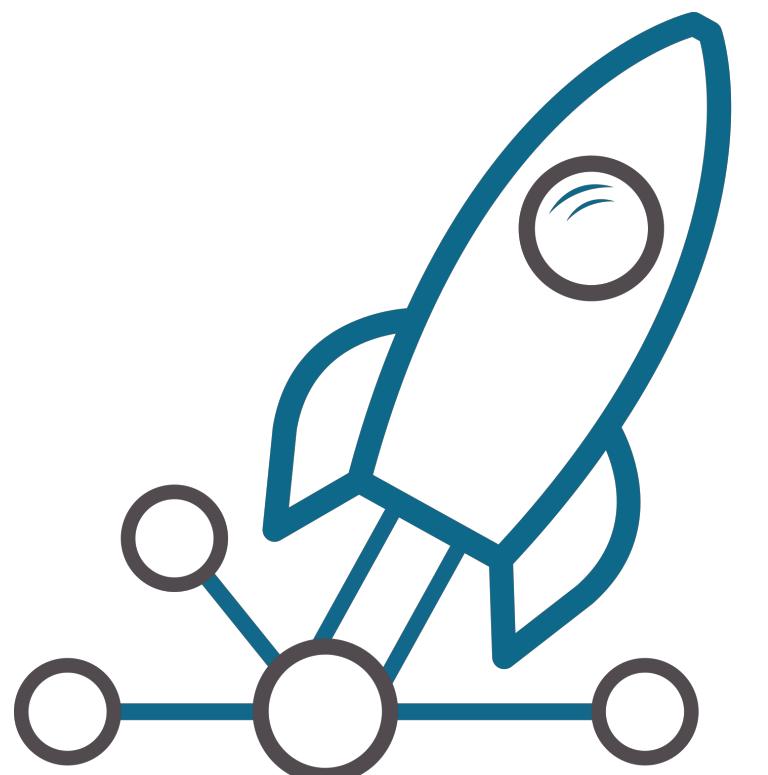

82%

The probability that the change was due to a real world event is high at (82%)
